

BRISBANE HYPNOSIS CENTRE

CODE OF CONDUCT & ETHICAL STATEMENT

We affirm that we will be ethical in our practice as a therapist, and will be honest - mentally, physically, and emotionally - in all our dealings in our profession.

We will treat individuals who seek our help as *people*, and never just as patients or customers.

We will ensure that our clients' dignity is preserved at all times. We will maintain their confidentiality.

We will seek to do the highest good for each person we see in our role as professionals.

We will refrain from making claims about our abilities and will not offer guarantees of particular outcomes.

We will not defame other therapists or professions.

We will continue to study to maintain our proficiency, and attend to personal and professional development. We will maintain a formal self-reflection practice as it relates to our work as an hypnotherapist.

We will maintain the ethics and the dignity of my chosen profession in all our dealings with our teachers, fellow therapists and with the general public.

We will seek to recognise our limitations and work to overcome them, but will always work within the limits of our ability.

Above all, we will do no harm.
